Status of Soviet SS-9 Training Sites (S)

(TSR) Conversion construction at the training silos at five of the six SS-9/SS-18 ICBM complexes has been suspended. These training silos are at the Aleysk, Dombrovskiy, Imeni Gastello, Uzhur, and Zhangiz-Tobe ICBM Complexes. Environmental netting had been placed over three of these training silos. At the Kartaly ICBM complex training silo, conversion construction was progressing at a slow pace.

Aleysk ICBM Complex (S)

(TSR) Preconversion construction was seen at training site 14X [] when rails had been constructed behind the silo door. Initial conversion construction was seen on [] when the area in front of the silo was excavated. The silo door had not been removed and no further activity had been seen []

25X1

Dombrovskiy ICBM Complex (S)

(TSR) Preconversion construction at training site 33X was observed [] when the silo door was open. Initial conversion activity was observed [] the exhaust deflector, the silo door, and the silo liner had been removed from the silo. [] netting material was extended over the portion of the silo which was originally covered by the silo door, perhaps to prevent people or objects from falling into the silo. A rigid framework supported the netting (Figure 1). No additional conversion construction activity had been observed at this site []

Imeni Gastello ICBM Complex (S)

(TSR) Initial conversion construction was observed at training site 21X [] the silo door had been rolled back and the exhaust deflectors and the silo liners had been removed. Removal of the IIC silo components continued [] Netting material was observed draped over the entire silo headworks (Figure 2 []) a hole in the netting was observed; however, no apparent attempt has been made to repair this opening. No additional conversion construction activity had been observed at this site []

Uzhur ICBM Complex (S)

(TSR) Initial conversion construction was observed at training site 19X [] The silo door was being dismantled and the exhaust deflectors and the silo liner had been removed from the silo [] the IIC silo headworks was still present. [] the IIC silo headworks had been removed and the IIF silo walls had been constructed and backfilled. All construction ceased and no further activity was observed as []

Zhangiz-Tobe ICBM Complex (S)

(TSR) Preconversion construction at training site 22X was observed [redacted] 25X1
when the silo door was open. Initial conversion activity was observed on [redacted]
the silo door was being dismantled and the area in front of the silo had been excavated. By [redacted] 25X1
the exhaust deflectors and the silo liner had been removed. The IIIC silo headworks
was still intact and an environmental cover was over the silo hole. No further conversion
construction activity had been observed at this site [redacted] 25X1

Kartaly ICBM Complex (S)

(TSR) Initial conversion activity was observed at training site 27X [redacted] 25X1
the door was open and the area in front of the silo had been excavated. [redacted] the 25X1
IIIC silo headworks had been removed, and [redacted] the silo wall for the IIIF silo had been 25X1
erected. [redacted] there was no apparent change to the silo; however, the con- 25X1
struction crane remained at the site.
